Parent Release

I understand that by allowing my child to attend tonight's presentation on How Their Body Is Changing will include subject matter covering their sexuality, what to expect the next few years in their development and God's perspective on sex for them. There will be a video portion and a discussion following. The intent of this class is to balance what they are receiving in public school and bring a biblical perspective how God has made and designed our bodies for sex within marriage.

Should you want to check out a copy of this video and watch it at home with your child I am happy to provide that for you. If you would like to preview it ahead of time, I am happy to provide a copy for you.
